Subject: NEIGHBOURHOOD PLANNING GROUP

Hi Roger

Please accept my apologies for the lateness of my email.

Firstly the one main thing that affects us at Newbold Verdon co-op is the lack of consideration for our parking spaces.

Customers are not always able to park on our car park due to people using the club parking there. I am aware that it is also the other way round with our customers using the club car park during the day. Customers are therefore driving round the back to our staff parking area and parking there, this becomes an issue when we then get deliveries due to the lack of room for the lorries or the anger of customers who get blocked in by our deliveries. We have now had another customers car hit by a delivery lorry due to parking congestion. If only the village had a car park people could use for parking and using all of the amenities in the village.

Secondly, we have a small amount of local people who feel its ok to steal from us. I have names are some of them but not sure of others.

We would like to see improved the lighting, this is probably out of your hands but we have colleagues who leave home for work around 5.30-5.45am and its pitch black which I feel is a concern for their safety. I drive to work but for these colleagues they are walking through the streets of the village alone.

Hope we have been able to contribute to your planning group with our issues and suggestions.

Kind Regards
Michelle Ward
Store Manager
